The Pebble Project is pleased to offer you an invitation to join the online web broadcast "webinar" of the 2008 Baseline Environmental Team Agency Meeting presentations. This service is being provided to allow agency personnel, consultants and members of the public who are unable to attend the meetings in person an opportunity to watch and listen to the presentations live via the internet and with the option to listen and ask questions via a conference telephone call-in. Please note that the actual meeting location is not open to the general public and only registered regulatory agency personnel and project consultants will be allowed into the meetings.

To participate in the Webinar, simply use the links provided on the following page to join the meeting session available each day in order to view the presentations on your computer screen in real time and with the option to listen to the audio either via your computer speakers or via a separate telephone conference call. At the time of the actual meeting, when you open the meeting link you will be prompted to open and run a small GoToMeeting service program titled "g2m_download.exe" that will enable you to watch the presentation screen and listen to the audio. The broadcast for each days meeting will begin at 9:00am (AST) and continue until the last presentation of the day has concluded. No pre-registration or password is needed to join the webinar and you may leave and re-join while the meetings are is in session.

After you have logged into the meeting, the webinar application will display the PowerPoint slides in real time just as they are being presented. There is also a small toolbar for the GoToMeeting application that allows you to control the screen size. Note that if you maximize the presentation view to take up your entire screen, you will need to use the toolbar controls to minimize the screen in order to regain access to your normal desktop.

The webinar toolbar has a section for sending text messages directly to the webinar administrator. This messaging feature can be used to get assistance with using the webinar program or to provide feedback concerning the audio sound quality. Please note that the meeting presenters will not be monitoring the toolbar text messages so the toolbar should not be used for asking questions to the presenters. Alternately, you may call the webinar administrator (Jason Gray) at (907) 862-6547 if you need assistance before or during the webinar or contact him by e-mail at jasongray@pebblepartnership.com if you need assistance prior to the start of the meetings.

In order to pre-test the webinar setup, we will have an optional test session on Friday, November 14th at 11:00am AST. Please consider registering to join the practice session so you can test your system and connection prior to the actual conference and avoid any hassle later.

In addition to the web based presentation of slides and audio, you may alternately call in via telephone to a toll-free conference call in order for agency personnel to ask questions to and interact with the presenters.
The toll-free conference call number for all 3 days will be 1-800-315-6338, and then when prompted by the system enter access code 243621 to join the call.

Pebble Project Baseline Environmental Team Agency Meetings - Login Practice Session
